

NOTICE

A team from University of Delhi South Campus is organizing a Blood Pressure Awareness Campaign and Measurement Camp in North Campus at the following places on 26 May 2017, 10 am onwards:

- 1. Utility Centre**
- 2. University Canteen**
- 3. Room No. 16 A Arts Faculty**
- 4. Central library**

Kindly inform your students, lab members, office members, colleagues, staff, family members, friends, domestic help and all adult individuals to take benefit of this camp.

Brief Description

High Blood Pressure (BP) or Hypertension causes havoc worldwide and is the primary cause of cardiovascular diseases, stroke and other metabolic disorders. It is essential that we combat it appropriately.

The International Society of Hypertension (ISH) has identified increased awareness as a key issue in the fight against raised Blood Pressure (BP). To address the huge disease burden caused by raised BP, it is imperative that we increase the levels of awareness among the world's adult population and inculcate a habit of regular BP measurement.

For the same, we wish to measure BP of every consenting individual above the age of 18 years at all possible places during the month of May 2017. In case further medical advice is required, we will refer them to physicians accordingly. We will discuss with individuals about the ways to keep blood pressure under control. This is part of a global campaign spearheaded by ICMR and Public Health Foundation of India in India, of which we are a part.

Thanking You,

**Prof. Kavita Sharma
(Head of the Department)**
